Annual Report
2018

INTRODUCTION:

After conducting several studies, researches and numerous field visits; the CSR team at Daleel Petroleum has prepared this annual plan covering the most significant and sustainable projects that commensurate with the society's needs. While preparing the annual plan, we worked closely with the relevant governmental authorities in order to achieve the maximum public benefit and to target the relevant segments of the society in each project.

The company realized the need to do more on these sectors in particular to make a tangible impact that can help the community members to live in well-being, healthy environment and with high level of awareness and education.

The innovation in educational methods and scientific revolution have urged Daleel to be in line with the world change, thereby Daleel has supported many programs and projects which can raise the educational level of the community. For instance, offering schools modern teaching technologies and sponsoring different scientific workshops and lectures. Also it's worth mentioning that participating in offering proper living environment that has all the required amenities is one of the things that Daleel concentrated on.

Also Daleel Petroleum has supported the disable people, developed their skills and quified them to compete for future jobs to participate in serving Oman. In this sector, many initiatives and projects have been implemented such as participating in building Al-Wafa Rehabilitation Center for Disabled Children, providing Auxiliary devices and sponsoring the related events and seminars.

It's worth to mention that Daleel had supported many causes which are under sectors of Education & Training, Healthcare & Safety, Sport, Environment, disable and community development.
